DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 25 is rejected under 35 U.S.C. 102(b) as being anticipated by Richter.

Richter shows means (16) for assembling and supporting first (15), second (15) and third (15) rigid struts substantially aligned in a common plane and means (16) for supporting a fourth (36) complete strut so as to extend out of the common plane at a substantially acute angle > 3 degrees.

Allowed Claims

Claims 1-24 are allowed.

Claim 1 is allowed for angle CAB and ABC determined according to the formula $Jx20.9 + Kx31.7 + Mx36 + Nx37.4$ and $Qx20.9 + Rx31.7 + Sx36 + Tx37.4$ respectively.

Claim 2-24 depend from claim 1 and are therefore allowed.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Thomsen reveals a method of joining tubular steel lattice members and a device for use in the execution of the method. Evans shows construction module, panel, and system. Aiken teaches geodesic domes and improved joints therefore.
